**The Euro Eco dispenser line is designed from an eco-effective and functional approach.**

The Euro Eco dispenser line is the third group of green products in our range. This dispenser line consists of nine products and is made from pure polypropylene: a plastic with great features such as high hardness, low moisture absorption, light weighted and resistant to bacterial growth. Polypropylene guarantees the highest quality, durability and a closed cyclic process. There are no chemical dyes added to the production.

## Durable and Environmental friendly products

Green is the colour of the environment. But green is becoming more and more the colour of Euro Products: supplier of toilet hygiene, non-wovens, paper products and cleaning cloths. We are expanding our green range and thereby reducing the impact on the environment. Because we are saving the environment and therefore taking our responsibility. We would like to share this responsibility with our customers. How?

We have expanded our product range durably by investing, innovating, developing, optimizing, reducing and recycling. Our Eco paper range of toilet-, hand towel- and cleaning paper carries the green flower of the European Eco label, a hallmark for less environmental harmful non-food products. For example, through energy- and water conservation, waste savings and reduction of emissions to air, water and soil are being made.

We are proud of the green certification on our products; we aim to keep and expand that certification of more products. Innovating is an essential point, a continuous process where Euro Products stands and goes for. New in our range are the high-quality cellulose paper products with European Eco label. Cellulose consists out of 100% recyclable, vegetable material. You have the assurance of good and green hygiene with our Euro Cellulose products too. We care for your health and that of future generations.

Shortly, our green vision has resulted into remarkable, practical products without compromising the quality. We can satisfy every customer with our green products.
