Microburst 3000 aerosol is the most compact fragrance system.

Thanks to the patented Microburst aerosol dispensing system the toilets are:

Always clean:

- The Microburst 3000 dispenser runs like clockwork and in a period of 90 days it distributes a fine dry mist of perfume continuously, that neutralise unpleasant smells.
- Meets the important care of the user of the public toilet.
- A fresh and pleasant odour, which enlarged the high standard of washroom cleanliness and hygiene.

Always free of unpleasant malodours:

- The Microburst formula eliminates unpleasant malodours by using more perfume and less propellants.
- The micro-molecules provide greater coverage and long lasting odour neutralizing with a more intensive perfume.
- All Microburst 3000 fragrances contain Microtrans Odor Neutralizing technology to effectively break down the malodours and facilitate a longstanding performance of the perfume. The clean, fresh scents signal hygiene and comfort
World-class Reliability
- A compact and an elegant design gives the washroom an improved image.
- A simple programming provides a user friendly sanitary environment and ensures further trouble free operation, 365 days a year.
- For a clean, safe and comfortable washroom, what is important for the health, the wellness and your essential business.

The technology of Microburst combines great looks with a low-cost and effective performance.
