EURO PRODUCTS EXPANDS THEIR SPECIAL ATTENTION ON DURABILITY.

A new colour accent for Euro Products besides the familiar blue colour: a unique extension of the European Eco-label.

The European Eco-label – an initiative of the European Union – indicates that a product meets the strict requirements made in the context of “Corporate Social Responsibility”.

This starting-point will be maintained throughout the whole production process.

From raw material to finished product.

All products under European Eco-label have been officially registered with a policy of production optimization, resulting:

- Less air- and water pollution;
- Reduced greenhouse gas emissions;
- Relatively low power consumption;
- Sustainable forest management;
- Maintenance of fish stocks.

The governments purchase 100% durable as from 2010, do not stay behind?!
